We Take A Closer Look!

- API-653 / API-510 / API-570 Inspections and Engineering Evaluations of Storage Tanks, Pressure Vessels, and Piping
- Complete NDT Methods of Inspection Including: UT, PT, MT, RT, Vac Box, MFL, Leak Detection
- Reduce Risk and Protect Investment
- Certified API Inspectors and Experienced Engineering Support to Provide Guidance on Repairs and Run/Replace Decisions
- Maintain Compliance with Government / Local Regulations and Industry Accepted Standards
- API-650 / API-653 / API-510 / API-570 / UL-142 / STI SP-001 / AWWA D100

Mechanical Integrity Inspections

Under increasing scrutiny from local, state, and federal regulations, today's terminal operators need up-to-date knowledge on the material condition of their facilities. With an aging infrastructure and higher demands for uptime, carefully planned and executed inspection and maintenance activities are crucial to ensuring regulatory compliance, facility safety, and optimization of resources.

Regardless of facility size, ATS can offer the people and expertise to keep your facility running safely and smoothly. Over 15 offices offer local, regional, and nationwide support. Contact ATS to find out about these and other services.

ATS offers a wealth of services to terminal operators to help ensure the integrity of their storage tanks, pressure vessels, piping systems, and auxiliary equipment.

- In-service and out-of-service inspections by certified American Petroleum Institute (API) and Steel Tank Institute (STI) inspectors.
- NDT Level II and Level III trained personnel meeting the requirements of SNT-TC-1A.
- Engineering evaluations and Risk Based Inspections (RBI) of equipment that allow for accurate run-replace-repair decisions to be made.
