

ATS ACQUISITION STRATEGY

Acquisition History

ATS has been actively investing in its existing business as well as acquiring other businesses for over 20 years. ATS is a privately-held company that is primarily owned by its management team. ATS strives to offer our customers the best possible service, our employees the most opportunity to grow and achieve their goals and our shareholders value. We are a highly decentralized business that provides its managers and divisions with significant autonomy to meet the customers' requirements and to achieve superior performance. For successful companies that may be considering a change of ownership, ATS offers a unique opportunity to join a larger organization and benefit from the significant resources of ATS, yet retain the unique culture and independence that made them successful. If you would like to learn more about ATS, please contact George Pfeil, Director of Corporate Development at gpfeil@atslab.com or (678) 444-2971.
