

ATS ACQUISITION STRATEGY

Acquisition History

ATS has been actively investing in its existing business as well as acquiring other businesses for over 20 years. We are a privately-held company, primarily owned by its employees and managers.

ATS strives to offer our **customers** the best possible service, our **employees** the most opportunity to grow and achieve their goals and our **shareholders** value.

We are a highly decentralized business and provide our managers with significant autonomy to meet the customers' requirements and to achieve superior performance. We seek to grow our group of businesses by adding like-minded managers and employees that complement our business. ATS offers a unique opportunity to successful businesses to join a larger organization and benefit from significant resources yet retain your unique culture and independence that made you successful.

For successful companies that may be considering a change of ownership, please contact George Pfeil, Director of Corporate Development at gpfeil@atslab.com or (678) 444-2971.
