

Additional Capabilities:

Network Design

When it's time to evaluate something as important as your network or workflow processes, working with someone who has the expertise to help and provide an objective view can be critical to the success of your business. At ATS Computer Solutions, we are your trusted technology partner and will be involved early enough in the process to help you make your IT investments some of the best investments you make.

Beginning with the analysis of current and future organizational needs, our computer network consultants can help you determine the impact on your network infrastructure. Then we design, implement, and manage your network to meet both your business objectives and your budget. ATS Computer Solutions is capable of delivering the following:

- Network Design
 - Project Planning
 - System Upgrade
 - Procurement Services
 - Implementation
 - Post Installation Support
 - Network Documentation

Certifications

ATS maintains current standards and certifications to provide the highest degree of quality for our clients.

- Microsoft® Certified
- Traverse™
- OSAS™

ATS Computer Solutions offers an extensive variety of software applications to help you manage, maintain and grow your business. We can recommend and provide unique, custom software solutions across a variety of platforms to enhance your productivity - to include e-business solutions.

Traverse™ Accounting Software

Traverse is an award-winning software solution built using Microsoft SQL Server Technology. Traverse not only provides core accounting, but also integrates distribution, manufacturing and service applications - while providing a variety of other vertical packages. As one of the few open source code products on the market, Traverse can be customized to fit your unique, specific business needs.

Open Systems Accounting Software (OSAS™)

OSAS has been on the market for over 20 years and had evolved into a complete back office solution, offering core accounting functionality with integrated distribution, manufacturing and service applications. A truly platform-independent solution, OSAS will run in a Windows, Linux, UNIX, or Mac OS environment. Like Traverse, OSAS is fully customizable to grow and adapt to your business needs.

Web Development

The internet has become the most popular source for finding reliable and reputable businesses. ATS is committed to developing websites that have a creative edge that distinguishes you from your competition and helps you communicate your expertise and professional standards. We want to get to know you and your aspirations so that we can build a website that will assist you in becoming a trailblazer in your industry. In order to help you achieve your online goals ATS offers a wide variety of web development and web design services.

- Page coding
- Database driven websites
- E-commerce
- Custom blog designs
- RSS feeds
- Web forms
- Shopping carts
- Flash sites

Search Engine Optimization (SEO) and Pay Per Click (PPC) Marketing

Many companies will spend a lot of money to have a website developed that is both attractive and engaging, but never take into account that their site was not built with search engines in mind. The unfortunate fact is, you can pour lots of money into your site but you have no guarantee that it will be noticed.

To help with this process many companies now use pay-per-click (PPC) advertising. The beauty of PPC advertising is the speed at which you can reach your target market. If you are in a hurry to get first page placements and high traffic numbers to your site, ATS can help you get noticed through pay-per-click campaigns. From extensive keyword research to the day-to-day management of your PPC campaigns, to continually analyzing conversion data, ATS can help.

Our PPC campaign management professionals assist companies with budgets ranging from \$10/day to \$1000(s)/day. Let ATS Computer Solutions PPC team maximize your ad spend to attract targeted, qualified traffic - and increase your ROI.

Help Desk Support

ATS computer Solutions offers prepaid help desk support so you can put all of your team members in touch with unlimited IT telephone support and assistance. Empower your team members to seek answers and solutions to their computer related questions, from a trusted IT source without having to seek approval or ask permission every time. The IT experts at ATS are on-call with quick answers and advice whenever your team members need it, as they need it.

Unlimited Network Support

At a fraction of the cost of a full-time IT employee, ATS computer Solutions can provide Unlimited Network Support. We incorporate the daily tasks of a network administrator into a package that ensures your entire system is kept safe, secure and protected-for a flat monthly fee at a price every business can afford.

Server Maintenance/Network Monitoring

- 24/7 Real time monitoring of mission critical server hardware, software and network devices. Up to five devices are included.
- Unlimited support for all server/network issues and upgrades.
- Routine patch/update management for server OS and software.
- Backup monitoring, management and archiving.
- Yearly disaster recovery testing and infrastructure upgrade planning.
- Monthly usage reports.

Workstation Support and Maintenance

- Unlimited support for all desktop issues and upgrades.
- Regular on-site visits.
- Routine patch/update management for workstation operating system and software

Help Desk Support

- Unlimited support
- Desktop Optimization
- License Management
- Asset Management

IT Consulting

Protect your investment and maximize the performance and efficiency of your technology system-so that it runs at optimum functionality, with minimal downtime, frustration and conflicts that limit your system's peak performance.

Whether you're looking for a turnkey network solution for your small business or a custom option tailored specifically to your company's needs, ATS consultants can provide guidance in the following areas:

- Network design
- Upgrades and migrations
- Remote access solutions
- In-office mail and web hosting
- Remote office connectivity (VPN)
- Network security design and auditing
- Performance monitoring
- Voice and data cabling

Remote Server Monitoring

Businesses today are more dependent than ever on fast, reliable technology systems. Without continuous maintenance and monitoring, even state-of-the-art technology systems can be rendered useless. You may even think you have the proper security systems, virus protections and backup procedures in place, only to have one breach or oversight cause your entire system to fail without warning. Just one crash translates into thousands of dollars of downtime, lost productivity, lost data, and lost business.

At a fraction of the cost of a full-time IT employee, ATS Computer Solutions can provide reliable remote system monitoring of your server. We incorporate the daily tasks of a network administrator into a package that ensures your system is secure and impenetrable-at a price every business can afford.
