

Joint Multi-Party Investigations

Joint Multi-Party Investigations

Applied Technical Services is an accredited testing lab with the space, equipment and the manpower necessary for your next litigation joint inspection. Whether you are a manufacturer or retailer in need of an analysis of a reported failure (what, how or why it happened?) or an attorney litigating a product liability case, our Fire and Forensics team of experts are ready to help.

The Forensics Investigators at ATS provide an objective and science-based analysis which can enhance the client's ability to make informed decisions. From experience, we understand the importance of rendering an opinion (and reasons for them) that will withstand judicial scrutiny and are effectively communicated to the trier of fact.

Since 1967 we have partnered with clients from many different areas including aviation, automotive and consumer products and helped them with safety aspects, consumer product inspections, accident and litigation investigations, as well as many other issues. Applied Technical Services is the benchmark for any joint accident or incident investigation as we are the biggest, most prepared lab in the south-east. ATS has a secured facility for your evidence storage needs.

Joint Multi-Party Investigations

Our experts are highly knowledgeable and experienced with current compliance regulations. Applied Technical Services labs are ISO 9001 certified and ISO 17025 (A2LA) accredited, and our quality assurance program meets the most stringent industry requirements.

Included in the inspection are support technicians. These technicians will assist with the attainment of all necessary tools or supplies needed, as well as the assignment of separate conference rooms available with or without media technology for the different parties. A full day laboratory rental includes lunch catering for the litigation or investigation party.
